

## END SHOW REPORT

The 19<sup>th</sup> China International Foundry Expo, the 20<sup>th</sup> China International Metallurgical Industry Exhibition, and the 19<sup>th</sup> China International Industrial Furnace and Thermal Technology Exhibition successfully completed at the National Exhibition and Convention Center (Shanghai) from May 26 to 28, 2021. The China International Die-casting Industry Exhibition and China International Fluid Machinery Exhibition were held concurrently at the same venue. The exhibition covered more than 120,000 square meters and gathered over 1,300 exhibitors. The products covered the up-down stream of casting, die-casting, metallurgy, industrial furnaces, etc., and included from processing, materials to technology and other services. The visitors reached 96,186 person-times, and the opening ceremony video racked up 146,986 Tik Tok views.

### **International Strong Support**

Due to the pandemic, the international industry organizations and overseas industry associations sent videos to wish the exhibition a complete success, such as German Foundry Association, Japan Foundry Association, Italian Foundry Suppliers Association, Casting Exporters' Association of Spain, Russian Foundry Association, Korean Foundry Society, Indian Foundry Association, German Foundry Planet Magazine, Malaysian Machine Manufacturers Association, Thai Foundry Association, Pakistan Foundry Association, Vietnam Foundry Metallurgical Science and Technology Association, Mongolian Metallurgical Association, Indonesia Foundry Association, etc.

### **Famous Brands under One Roof**

A large number of well-known brands gathered in this year's exhibition and brought high-quality products, technologies and solutions, such as DISA, Vesuvius, Sinto, Primetals, HA, Ziheng, Xinyan, Clariant, Loramendi & Aurrenak, Inductotherm, Fondarc, Sino-Foundry, ASK, Fuji Electric, FilterTec, Elkem, Magma, TEMC, Hidea, Fata, Insertec, CPC, etc. As representatives of local industries, Hong Kong Pavilion, Suzhou Pavilion, Chongqing Pavilion and Guangdong Pavilion showcased their specialty products and their contribution to implement green casting and achieve sustainable development.

### **Exhibit Segmentation and Precise Positioning**

This exhibition is featured with intelligent manufacturing and robots, casting innovation area, testing instrument, safety and environmental protection, pipe network system castings, industrial clusters, Yangtze River Delta famous enterprises park, casting culture, colleges and institutions. Connecting and diverse, the nine exhibition areas offered a platform of demonstration and trade communication.

### **Various Concurrent Events**

The China Foundry Association Congress, the China International Steel Congress, the China Iron and Steel Industry Digital Solutions Summit, and the China Iron and Steel Seminar were held concurrently. Various concurrent events, such as award ceremony for high-quality castings, on-site consultations with experts and new product launch meetings, attracted industrial professionals to discuss and communicate, and highly enhanced the satisfaction of visitors and exhibitors.

This exhibition opened a new stage for China's "14<sup>th</sup> Five-Year Plan", reshaped the industrial chain, and accelerated the Dual Circulation. In the future, we will continue to upgrade the exhibition functions and contribute to the industry development. Metal + Metallurgy China 2022 will be held at the National Exhibition and Convention Center (Shanghai) on May 18 to 21 next year. Look forward to seeing you again!
